

# Compatibility with Android

11/14/2023

USB/Bluetooth connection failure may occur on some Android devices that support the OS requirements, since the Android manufactures customize their own devices.

- USB-MIDI compatible system is required when connecting with USB-MIDI.
- USB Audio Device Class (Asynchronous) compatible system is required when connecting with USB-Audio.
- Advanced Audio Distribution Profile (A2DP) compatible system is required when connecting with Bluetooth Audio.
- Bluetooth MIDI (MIDI over Bluetooth low energy) compatible system is required with Bluetooth MIDI.

Note: \*USB-OTG cable is required when connecting with USB.

Note: \*Please note that we have discontinued our support for any products not listed in these charts.

Note: \*We have tested new products with the latest versions as of November 2023.

Product Name	OS	Android 10 support	Android 11 support	Android 12 support	Android 13 support	Android 14 support	Remarks
<b>VOX</b>							
Tone Room		Yes	Yes*1	Yes*1	Yes*2	Yes*2	*1: Depending on your "system navigation" settings, you may not touch all buttons and UI. *2: It works fine with the currently distributed ToneRoom (beta). < <a href="https://play.google.com/store/apps/details?id=com.voxamps.tonerroom_beta&amp;hl=en">https://play.google.com/store/apps/details?id=com.voxamps.tonerroom_beta&amp;hl=en</a> >
